

9th Weinman Symposium

University of Hawaii Cancer Center Presents:

International Conference on Gene, Metabolism, and Cancer

2017 Weinman Award Recipient

Dr. Phillip Allen Sharp

Dr. Sharp shared the 1993 Nobel Prize in Physiology or Medicine with Richard J. Roberts for "the discovery that genes in eukaryotes are not contiguous strings but contain introns, and that the splicing of messenger RNA to delete those introns can occur in different ways, yielding different proteins from the same DNA sequence".

Dr. Sharp's current research focuses on small RNAs and other types of non-coding RNAs.
